

# DESMOLDOIL A

INDUSTRY

Lubricants

## Description

DESMOLDOIL A is a compound formulated to act as a mould release agent in a water base in various applications. It contains a selected mix of oils, which have appropriate additives and have been treated to fulfil their function.

It is a product that cannot be labelled, which is specially formulated to demould concrete elements on any type of surface such as wood, iron, etc.

## Properties

- Excellent demoulding properties.
- Environmentally friendly (can not be labelled).
- Fully water compatible.
- Good oxidation resistance and storage stability.
- High covering capacity.
- Excellent finish.

## Technical specifications

	UNIT	METHOD	VALUE
Appearance		ASTM D 1500	<1
Viscosity at 40 °C	cSt	ASTM D 445	20 - 25

Unless otherwise indicated, the values stated in the technical characteristics are not specifications and should only be considered as typical.
